## EDUCATION

---

**University of California - Irvine,**  
Bachelor of Science in Software Engineering

Sep 2017 – Jun 2021 | Irvine, CA

## TECHNICAL SKILLS

---

**Languages:** Python, JavaScript, HTML, CSS, C#, SQL, Java, Typescript, Swift

**Technologies:** NodeJS, ASP.Net, Firebase, AngularJS, Ionic

## WORK EXPERIENCE

---

**Fugu Corporation, Full-Stack Software Developer** Jan 2021 – present | Irvine, CA

- Developing with ASP.NET/C#, HTML, and JavaScript using MS Visual Studio and MS SQL to build E-learning web applications and deploying code to multiple production servers accessed by over 400,000 users per day.
- Responsible for creating and maintaining hundreds of CRUD stored procedures, transitioning business logic using standard ADO to organized DTOs, tiered architecture, and the repository pattern.
- Error-checking, rewriting, and refactoring code up to a decade in age to ensure software is up to date, speeding up load times and preventing volatile bugs.
- Programming dozens of custom tool managers for both clients and in-house employees and improving business performance with the creation of various administrator pages used for sales, products, ad campaigns, coupons/access codes, and education management.

**Paciolan, Mobile Software Engineer Intern** Oct 2020 – Mar 2021 | Irvine, CA

- Lead iOS developer and designer for a celebrity interaction app, Fan360, using Swift programming language, SwiftUI library, and Google Firebase.
- Conceptualized the user interface using wireframes and high-fidelity prototypes via Sketch and iterated by collecting consumer feedback.
- Implemented a live chatting system and dynamic/responsive pages by communicating with Cloud Firestore.
- Coordinated weekly with clients to discuss the design process, development process, and requirements engineering documents with roadmaps and SCRUM planning.

**Hughes Media & Design Lab, Student Game Developer** Oct 2020 – Dec 2020 | Irvine, CA

- Used C# and the Unity3D to develop new features and fine-tune the quality of code for Patient Zero, a VR Bio-Educational game teaching lab techniques and basic biology concepts.
- Collaborated with a team of thirty scientists, designers, artists, and programmers.

## PROJECTS

---

**Sleep Tracker, A Progressive Web Application**

- Developed and designed functionality using Ionic, NodeJS, Typescript, AngularJS, and HTML/CSS to allow users to record and track their nightly sleep, locally storing the information using Capacitor storage.
- Implemented various animations, gesture controls, and error prevention features to ensure usability standards were met following good principles of mobile design.

## AWARDS

---

**HackDavis 2021 - Best Pitch Sponsored By Contrary, University of California - Davis**

- Created and pitched Playtest, a flashcard-based platform centered on personalized group study through casual multiplayer games.
